About This Document

This document defines abbreviations and acronyms for TPS.

Release Information

Document Name	Document ID	Release Number	Publication Date
TPS Acronyms and Abbreviations - TP42	TP42-230	Release Independent	12/03

Contacts

World Wide Web

The following lists Honeywell's World Wide Web sites that will be of interest to our industry solutions customers.

Honeywell Organization	WWW Address (URL)
Corporate	http://www.honeywell.com
Industrial Automation and Control	http://www.acs.honeywell.com
International	http://content.honeywell.com/global/

Telephone

Contact us by telephone at the numbers listed below.

Organization		Phone Number	
United States and Canada	Honeywell International Inc.	1-800-343-0228	Sales
	Industrial Solutions	1-800-525-7439	Service
		1-800-822-7673	Tech. Support
Asia Pacific	Honeywell Asia Pacific Inc.	(852) 23 31 9133	

Telephone

	Hong Kong	
Europe	Honeywell PACE Brussels, Belgium	[32-2] 728-2711
Latin America	Honeywell International Inc. Sunrise, Florida U.S.A.	(954) 845-2600

Symbol Definitions

The following table lists those symbols used in this document to denote certain conditions.

Symbol	Definition
	ATTENTION: Identifies information that requires special consideration.
	TIP: Identifies advice or hints for the user, often in terms of performing a task.
	REFERENCE -EXTERNAL: Identifies an additional source of information outside of the bookset.
	REFERENCE - INTERNAL: Identifies an additional source of information within the bookset.
CAUTION	Indicates a situation which, if not avoided, may result in equipment or work (data) on the system being damaged or lost, or may result in the inability to properly operate the process.
	CAUTION: Indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury. It may also be used to alert against unsafe practices. CAUTION symbol on the equipment refers the user to the product manual for additional information. The symbol appears next to required information in the manual.
	WARNING: Indicates a potentially hazardous situation which, if not avoided, could result in serious injury or death. WARNING symbol on the equipment refers the user to the product manual for additional information. The symbol appears next to required information in the manual.
	WARNING, Risk of electrical shock: Potential shock hazard where HAZARDOUS LIVE voltages greater than 30 Vrms, 42.4 Vpeak, or 60 VDC may be accessible.

Symbol	Definition
	ESD HAZARD: Danger of an electro-static discharge to which equipment may be sensitive. Observe precautions for handling electrostatic sensitive devices
	Protective Earth (PE) terminal: Provided for connection of the protective earth (green or green/yellow) supply system conductor.
	Functional earth terminal: Used for non-safety purposes such as noise immunity improvement. NOTE: This connection shall be bonded to Protective Earth at the source of supply in accordance with national local electrical code requirements.
	Earth Ground. Functional earth connection. NOTE: This connection shall be bonded to Protective Earth at the source of supply in accordance with national and local electrical code requirements.
	Chassis Ground: Identifies a connection to the chassis or frame of the equipment shall be bonded to Protective Earth at the source of supply in accordance with national and local electrical code requirements.

#s or Symbols

1/1

Equipment that mounts in Zone 1 hazardous area, and interfaces to field devices installed in a Zone 1 or Zone 0 hazardous area

2/1

Equipment that mounts in Zone 2 hazardous area, and interfaces to field devices installed in a Zone 1 or Zone 0 hazardous area

2/2

Equipment that mounts in Zone 2 hazardous area, and interfaces to field devices installed in a Zone 2 hazardous area

2/x

Generic or umbrella reference to include 2/1 and 2/2. Usually applies to IOLBIM only. A single 2/x IOLBIM can support either 2/1 or 2/2 IOMs or a mixture.

GUSKeylock

The security level associated with data access requests between a GUS node and the TPN. This can be manually changed on a GUS Integrated Keyboard (IKB) via a physical key setting, a GPB script, or the Native Window. The three levels for the GUS Keylock are: Operator, Engineer, and Supervisor.
